

COMPANY PROFILE

Burntwood School, London, United Kingdom

AN INTERNATIONAL BRAND WITH A PERSONAL APPROACH

The group AluK is a global leader in the design and engineering of aluminium window, door and curtain walling systems.

With more than sixty years of expertise and operations in major countries around the globe, our building systems have been specified for many of the world's most advanced and prestigious buildings.

Our long heritage of family-run businesses means we believe in a local approach, bringing AluK closer to our clients through expert service and support tailored to each market.

Through accredited testing facilities and in-house research and development, we ensure our products offer high performance solutions and exceed many industry standards.

'An international business dedicated to traditional values, local expertise and outstanding design and engineering.'

ENGINEERING EXCELLENCE SUPPORTED BY LOCAL EXPERTISE

With over 1500 employees and an annual turnover exceeding €350 million, the Group has a strong presence across Europe, Asia, and the Middle East.

- Operations in 8 countries
- 8 manufacturing sites
- 11 warehouses
- 2 manufacturing plants for system accessories
- 5 powder coating lines
- 9 thermal break assembly lines
- Serving nearly 2500 clients worldwide

Aluminium building systems engineered for performance

Our high performance solutions deliver the aesthetic design and functionality that sets our products apart in the market.

Regional expertise and support

From diligent research and development to in-depth technical support, AluK draws on local knowledge to provide quality solutions and personal service around the world.

Founded on family and traditional values

With a heritage of outstanding quality and service since 1949, our businesses are founded upon traditional values such as reliability and trust supported by a personal approach.

'Bringing together family run businesses and nurturing their values has made AluK a preferred partner around the world.'

DESIGN IN EVERYTHING WE DO

'With research and design teams around the world, we combine our expertise in performance building systems with local knowledge to develop products suited to your market.'

Our aluminium building systems and accessories are meticulously designed by international and local teams, who draw on detailed market knowledge and a wealth of experience to create tailored, high performance solutions.

We develop versatile systems appropriate for a variety of uses, from commercial to residential, to meet your needs.

Through thoughtful design and research and development, our products exceed many industry standards due to their durability, flexibility, and excellent thermal and acoustic performance.

» DESIGN TAILORED TO REGIONAL NEEDS

We tailor our building systems to your technical needs and local requirements, using the market expertise and creativity of our in-house design teams to realise your vision. We continually develop our market leading solutions to adhere to local regulations by improving thermal and acoustic performance, including significantly reducing U values. Our systems are supported by a complete range of AluK-designed accessories, providing you with the flexibility you need to create exceptional projects.

» INTERNATIONAL RESEARCH AND DEVELOPMENT

Our dedicated international and local research and development teams design and engineer high performance solutions, including window, door and curtain walling systems and accessories, for new build and refurbishment projects.

We invest heavily in research and development every year, helping us to deliver advanced aluminium building systems to meet the needs of architects, contractors, fabricators and homeowners.

All of our systems are manufactured using aluminium, an inherently strong material, which helps us develop solutions that are robust and durable, meeting your performance requirements.

PERFORMANCE ALUMINIUM BUILDING SYSTEMS

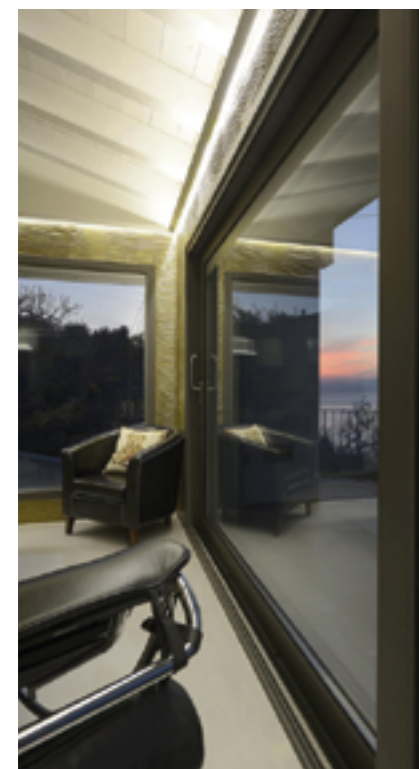

» WINDOW AND DOOR SYSTEMS

Our aluminium window and door systems are inherently strong, lightweight and sustainable, providing contemporary aesthetic profiles along with exceptional performance.

Secure and robust, our systems have been designed to meet and exceed requirements, while a complete range of accessories, design options and configurations offers unrivalled flexibility in terms of aesthetics and functionality.

Gemeentehuis, Baarle Nassau, Netherlands

» SLIDING DOOR SYSTEMS

AluK's aluminium sliding door systems offer slim profiles and enable large expanses of glazing to maximise light transmission, while maintaining internal temperatures and weather tightness when closed. Robust and durable, they are highly secure and rigorously tested to meet industry regulations.

Through a wide range of standard and optional features, our sliding door systems can achieve the right look and performance for any project.

Bright City, Beijing, China

» CURTAIN WALLING SYSTEMS

Our unique curtain walling systems offer the flexibility and advanced functionality demanded by modern buildings.

Combining strong but lightweight aluminium profiles with glazed sections, our systems can be faceted, double skinned, curved or angled to create the desired finish, whilst offering maximum

light transmission into the building with minimum profile sightlines.

All profiles are thermally broken to ensure maximum performance, and all our systems include a wide range of features to provide complete design flexibility.

» SHUTTERS AND LOUVRES

AluK shutters and louvres are designed to provide outstanding protection against external agents, such as noise, pollution and weather.

Our low maintenance screen solutions can be integrated into doors and windows, offering a secure, high performance choice that can enhance the look and feel of any building.

» CONSERVATORIES

AluK conservatory systems provide excellent light transmission, opening up homes and enhancing their architectural features. Our multimodular solutions are thermally insulated and are available in a range of configurations, offering the flexibility and choice you need to create relaxing living spaces. Manufactured from aluminium, our systems are sustainable, secure, and inherently strong.

» FOLDING DOOR SYSTEMS

Our aluminium folding door systems combine the strength and lightweight properties of aluminium with form and function of the highest standard. Highly versatile and configurable, they offer maximum control over the style and operation of the doors, accommodating the design specifications of any project. Multiple panels can be added with open in or open out door options for faultless operation, with accessibility and security at the heart of our systems.

» BALUSTRADES

Secure and durable, our balustrade systems conform to industry requirements to ensure optimum performance and user safety for a range of applications, including balconies and swimming pools.

With a variety of finishes and accessories available, our systems are highly configurable and adaptable to your requirements.

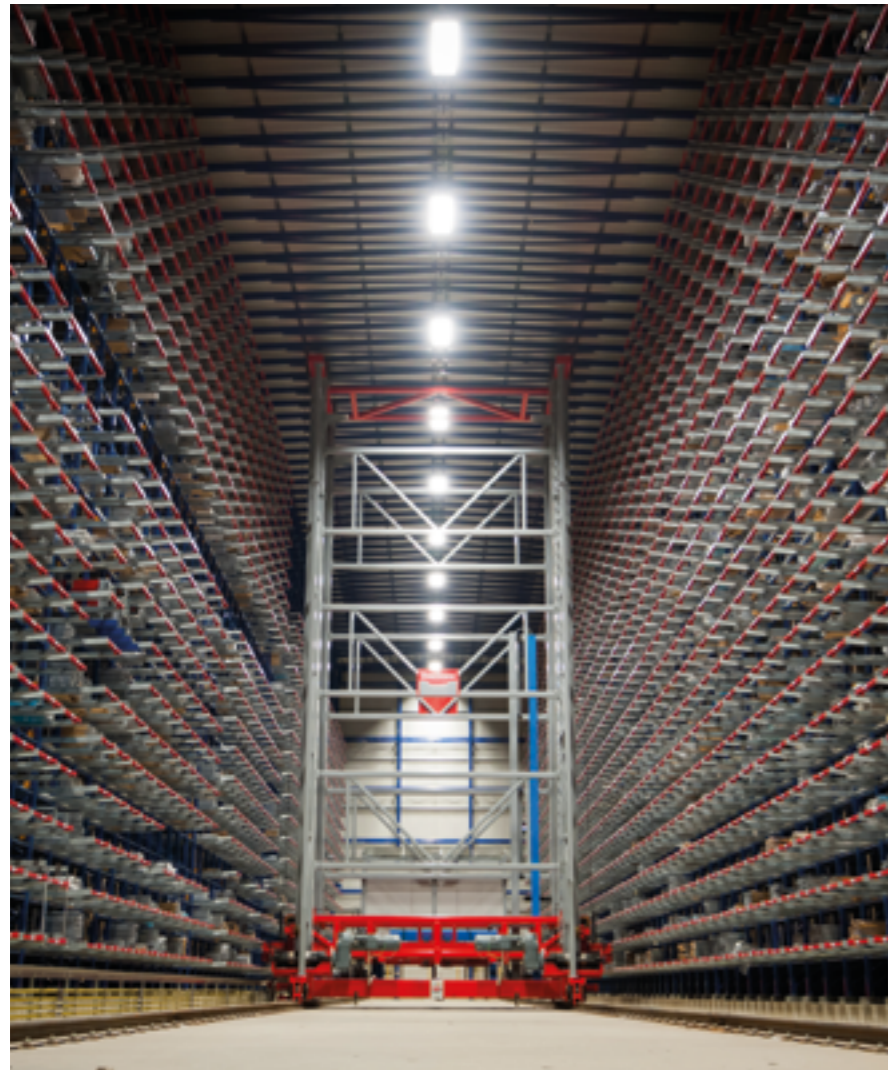

ADVANCED FACILITIES AND PRODUCT TESTING

All of our aluminium building systems are meticulously tested in our own 3rd party accredited facilities, where they are assessed on a range of performance criteria including water, wind, airtightness, durability, thermal insulation and acoustic insulation.

Drawing on the knowledge of our local experts, we make sure our systems achieve industry standards and provide the high performance and versatility needed for modern buildings in specific markets.

From auto-picking to delivery, we offer a fast and efficient service, creating systems that are robust and reliable.

Combined with detailed technical support, AluK provides a comprehensive service to help you complete your projects, whatever your requirements.

EFFICIENT PROCESSES AND GLOBAL FACILITIES

We store and finish our building systems locally, with in-house processes ensuring we provide an efficient and reliable service. Product auto-picking allows us to source and select our systems quickly from any of our ten warehouses, while our painting facilities are some of the most advanced in Europe, offering thousands of colours and dual colour options.

LOCAL EXPERTISE AND TECHNICAL SUPPORT

AluK combines local knowledge with high quality technical support to help you achieve your aims. Managed by an international team of engineers and experts, we ensure our aluminium building systems comply with specific country regulations, adapting our products to local needs.

Our experienced and knowledgeable teams are available to offer expert advice across a range of subjects including design, performance, fabrication, installation and maintenance, supporting you at every step of the process.

'Aluminium is one of the most sustainable construction products, with up to 90% coming from recycled sources without any deterioration in quality.'

SOLUTIONS BUILT ON SUSTAINABILITY

All of our building systems use aluminium as their core material, which offers an inherent strength necessary for building projects. Aluminium is known for being lightweight, durable, and low maintenance, while also aiding the high performance of our systems due to its immunity to UV, low conductivity, and fire resistance.

Up to 90% of all aluminium used in construction is recycled, using 95% less energy to manufacture than its primary production - with no deterioration in quality. This makes it one of the most sustainable construction materials available, reducing carbon emissions and contributing to the lifecycle costing of a building.
